

Alister consults in strategy development and futures thinking with clients in the government, private and higher education sectors. He works with senior management teams to help them identify what's driving change; to understand what that change means for their current and future ambition; and to develop and implement the strategies they need to secure long term advantage. He has worked with central and devolved administrations, providing strategy and policy advice and helping departments and agencies develop and practice foresight.

Alister is the author of the Government Office for Science's Futures Toolkit and provides training in futures thinking for practitioners in government and its partners. He is a member of Defra's Futures Advisory Group.

Qualifications: BSc in Molecular Biology, University of Edinburgh
PhD in Developmental Biology, University of Warwick

Recent career

2002 - 2022 **Waverley Management Consultants Ltd** Director
